Choosing a location in Delhi

Consider access for the people using the workspace.

Transit

Check proximity to metro and other transport connections.

Daily needs

Look for food, services, and practical conveniences nearby.

Work pattern

Match the location to how often the team comes in.

A simple comparison process

1. Define how many people need space and how often they attend.

2. Compare location, workspace type, amenities, and stated pricing terms.

3. Visit shortlisted spaces and confirm availability, access, and contract details.

Look beyond the headline price

Compare what is included, what costs extra, and how the terms fit your work pattern.

Ask how deposits, notice periods, meeting-room use, and additional seats are handled.

Confirm all costs and terms directly with each provider; offers and availability can change.

Choose the space that fits the way you work.
